

Kent Warden
Project Executive

To whom it may concern:

I highly recommend Peter Preisler as a development professional for the hospitality industry. Peter served as the primary design liaison for our general contractor Webcor throughout our 4 year, \$1 Billion hotel project located in downtown Los Angeles(The Hotel & Residences at LA Live.)

In my position as Project Executive for the developer/owner team, I worked closely with Peter to coordinate design issues with our architects Gensler, and numerous Interior Design firms. We also worked closely with the JW Marriott and Ritz-Carlton brand corporate teams to ensure quality and standards achievement. With a background in architecture in design, Peter was able to deliver on the intent of the design teams while coming up with practical construction solutions, and meeting the developer's budget goals. We had some very intense challenges, and Peter maintained professionalism and drove for resolution each time. He was extremely organized and clearly communicated issues to our team in a manner that kept our design/RFI/Submittal process on track, with minimal backlog.

I would be happy to speak with anyone regarding Peter's performance and would welcome the opportunity to work with him again.

Sincerely,

Kent Warden
Project Executive
